

Setup of Zen Cart and configuration of the Payson module.

This configuration instruction assumes that you already have setup a server or a local server where you can install ZenCart and configure our Payson module.

### Step 1. Installaion of ZenCart

When you have decided to use ZenCart as your plattform for your webshop this will be the first step in your installation of ZenCart. Start by clicking continue.

Next step is to accepting the license agreement for ZenCart.

## :: Zen Cart® Setup - System Inspection

Take a moment to check whether your webserver supports the features required for Zen Cart® to operate. Please resolve any errors or warnings before continuing. Then click on *Install* to continue.

**Documentation**

**Have you read the Installation Instructions yet?**

The [Installation Instructions](#) will be a big help if you have not already read them. There you will find information about permissions-levels you will need to set to various folders/files and other details about installation prerequisites, as well as things to do after you are done with installation. There are also links there to the [online FAQs](#) and other helpful resources.

**System Inspection Results**

**Webserver** = Microsoft-IIS/7.5  
**HTTP Host** = newzencart.local  
**Path\_Translated** = C:\modules\Newzencart\zc\_install\index.php  
**Real Path** = C:\modules\Newzencart  
**PHP O/S** = WINNT  
**PHP API Mode** = cgi-fcgi  
**PHP Max Execution Time per page** = 300

- ✓ **MySQL Support** = ON
- ✓ **PHP Version** = 5.4.14
- ⚠ **PHP Version** = 5.4.14
- ✓ **PHP Sessions Support** = ON
- ✓ **PHP Session.AutoStart** = OFF
- ✓ **PHP session.use\_trans\_sid** = OFF
- ✓ **Suggested SQL Cache Folder** = C:/modules/Newzencart/cache
- ✓ **PHP GD Support** = ON
- ✓ **GD Version** = GD bundled (2.0.34 compatible)
- ✓ **PHP ZLIB Compression Support** = ON
- ✓ **PHP OpenSSL Support** = ON
- ✓ **PHP cURL Support** = ON
- ✓ **CURL NON-SSL Capability** = Okay
- ✓ **CURL SSL Capability** = Okay
- ✓ **PHP Upload Support** = ON upload\_max\_filesize=2M; post\_max\_size=8M
- ✓ **PHP Upload TMP dir** = C:\php\upload
- ⚠ **Apache .htaccess Support** = OFF

[View PHPINFO for your server](#)

**Other System Information (For Reference Only)**

The following info does not necessarily indicate any problem or configuration issue. It is simply for the sake of displaying it in an easy-to-find location.

**PHP include\_path** = .;C:\php\pear  
**PHP SMTP destination** = localhost  
**PHP sendmail path** =  
**PHP sendmail 'from'** =

- ✓ **PHP open\_basedir restrictions** =
- ✓ **PHP Output Buffering (gzip)** = ON
- ✓ **PHP XML Support** = ON
- ✓ **PHP Session.Save\_Path** = C:\modules\Newzencart\cache -->Writeable

**File and Folder Permissions**

In order for the installer to store the setup information you provide in the following pages, the configure.php files shown below need to be "writable".

- ✓ **includes/configure.php** = Writeable
- ✓ **admin/includes/configure.php** = Writeable

In order for many Zen Cart® administrative and day-to-day functions to work properly, You need to mark several files/folders "Writeable". The following is a list of folders which need to be "read-write", along with recommended CHMOD settings. Please correct these settings before continuing installation. Refresh this page in your browser to re-check settings.

Some hosts may not allow you to set CHMOD 777, but only 666. Start with the higher setting first, and switch to lower values if required.

- ✓ **cache** = OK
- ✓ **images** = OK
- ✓ **includes/languages/english/html\_includes** = OK
- ✓ **logs** = OK
- ✓ **media** = OK
- ✓ **pub** = OK
- ✓ **admin/backups** = OK
- ✓ **admin/images/graphs** = OK

**Ready to Install? (This will wipe any existing data. You are NOT in Upgrade mode!!!)**

[Install](#) [Re-Check](#)

In the next step it's time to setup your database connection. This is where all your data concerning your webshop is saved.

Finished

## :: Zen Cart® Setup - Database Setup

Next we need to know some information on your database settings. Please carefully enter each setting in the appropriate box and press *Save Database Settings* to continue.

**Database Information**

**Database Character Set / Collation**  
Choose the database collation to be used. [more info...](#)

**Database Host**  
What is the database host? The database host can be in the form of a host name, such as 'db1.myserver.com', or as an IP-address, such as '192.168.0.1'. [more info...](#)

**Database Username**  
What is the username used to connect to the database? An example username is 'root'. [more info...](#)

**Database Password**  
What is the password used to connect to the database? The password is used together with the username, which forms your database user account. [more info...](#)

**Database Name**  
What is the name of the database used to hold the data? An example database name is 'zencart' or 'myaccount\_zencart'. [more info...](#)

**Database - OPTIONAL Settings**

It is recommended to leave these settings as-is unless you have a specific reason for altering them.

**Store Identifier (Table-Prefix)**  
What is the prefix you would like used for database tables? Example: zen\_  
Leave empty if no prefix is needed.  
You can use prefixes to allow more than one store to share the same database. [more info...](#)

**SQL Cache Method**  
Select the method to use for SQL caching. [more info...](#)

**Session/SQL Cache Directory**  
Enter the directory to use for file-based caching. [more info...](#)

Save Database Settings

Copyright © 2003-2013 Zen Cart®

In the next step check whether the information is correct for your store and edit it if something is'nt as it should be.

Finished

**:: Zen Cart® Setup - System Setup**

We will now setup the Zen Cart® System environment. Please carefully review each setting, and change if necessary to suit your directory layout. Then click on *Save System Settings* to continue.

**Server/Site Settings**

**Physical Path To Zen Cart®**  
Physical Path to your Zen Cart® directory.  
Leave no trailing slash. [more info...](#)

C:/modules/Newzencart

**URL to your Zen Cart® store**  
Virtual Path/URL to your Zen Cart® directory.  
Leave no trailing slash. [more info...](#)

http://newzencart.local

**SSL Details**

**Do you already have an SSL Certificate? If so, enter the details below.** If this is your first install, the supplied values are \*only best-guesses\*. Please verify the information with your hosting company if you are unsure of the correct details.

**HTTPS Domain**  
Virtual server for your secure Zen Cart® directory.  
Leave no trailing slash. [more info...](#)

https://newzencart.local

**HTTPS Server URL**  
Full Virtual Path to your secure Zen Cart® directory.  
Leave no trailing slash. [more info...](#)

https://newzencart.local

If your SSL certificate is already working, choose your SSL settings below.

**DO NOT enable SSL here if you do not already have SSL enabled on your hosting account.** If you enable SSL but the SSL address you provide does not work, you will not be able to access your admin site nor log in to your store. You can activate SSL later by editing settings in your configure.php file.

**Enable SSL**  
Would you like to enable Secure Sockets Layer in Customer area?  
Leave this set to NO unless you're SURE you have SSL working. [more info...](#)

☐ YES ☒ NO

**Enable SSL in Admin Area**  
Would you like to enable Secure Sockets Layer for Admin areas?  
Leave this set to NO unless you're SURE you have SSL working. [more info...](#)

In the following crucial step it is time to setup your admin account. In this setup you we set a temporary password now and after the first login you will have to change this to something else.

When you set a password for this account always try to make it a complex password. If someone unauthorised would get access to this account the consequence can be devastating.

### :: Zen Cart® Setup - Administrator Account Setup

To administer settings in your Zen Cart® shop, you need an Administrative account. Please select an administrator's name, and password, and enter an email address for reset passwords to be sent to. Enter and check the information carefully and press *Save Admin Settings* when you are done.

#### Administrator Information

**Administrator's Username**  
Enter the username to be used for your Zen Cart® administrator account.   
[more info...](#)

**TEMPORARY Admin Password**  
Enter a **TEMPORARY** password to be used for your Zen Cart® administrator account. You will be asked to change this password at first login.  
Your password **must contain both NUMBERS and LETTERS and minimum 7 characters.** [more info...](#)

**Confirm temporary Admin Password**  
Re-enter the temporary password. [more info...](#)

**Administrator's Email**  
Enter the email address to be used for your Zen Cart® administrator account. This will be used for testing newsletter emails and for sending password resets, etc. [more info...](#)

#### Upgrade Detection

☒ **Check for Zen Cart® updates when logging into Admin**  
This will attempt to talk to the live Zen Cart® versioning server to determine if an upgrade is available or not. If an update is available, a message will appear in admin. It will NOT automatically APPLY any upgrades.  
You can override this later in Admin->Config->My Store->Check if version update is available.

[Save Admin Settings](#)

**[Finished](#)**

## :: Zen Cart® Setup - Finished

### Congratulations!

**You have successfully installed Zen Cart® on your system!**

### NEXT STEPS

For security, YOU NEED TO RENAME your /admin/ folder to a name less likely to be 'guessed' by someone probing your site for illegitimate access. There's an FAQ article on [Renaming Your Admin Folder](#) which will guide you through the simple steps.

Also for security, you will need to reset permissions on your **configure.php** files located in the **/admin/includes/** and **/includes/** folders back to read-only mode before allowing people to access your store.

Additionally, you need to remove the **/zc\_install** folder so that someone can't re-install your shop again and wipe out your database! Warnings will appear until the folder has been removed.

### DONATE

You can show your appreciation for our free software, and can support future development by making a donation to the Zen Cart project: [Make a donation of any size by clicking here. Thanks in advance!](#)

### CONFIGURATION

We encourage you to begin by [reading the FAQ's in our online support forums](#) for useful information to assist with configuring and customizing your online shop the way you wish it to look and operate.

If you have questions, this is the first place to look! If you're stumped, feel free to post a question! We have a helpful, friendly, knowledgeable community who welcomes you.

It's also **important** that you check out the **Documentation** in the **/docs folder** of your site. [Click here to view a listing.](#)

### IMPORTANT READING

The most important tool you'll use when customizing your site is the **Developers Tool Kit**, which is in the **Admin area, under Tools**. You can use it to search for almost anything you might like to customize or change, especially the text displayed on your site.

The most important concept you'll want to become familiar with in order to customize your site is our **template system**. There are some very good articles on the template system in our [online FAQ section](#).

### ADDITIONAL READING

The [Zen Cart® Wiki](#) is a helpful place to find tips and tricks and general use information.

We're glad you chose Zen Cart® to be your e-Commerce solution!

[Visit us online at \*\*www.zen-cart.com\*\*](#)

Press the *Store* button below to test out your store or press the *Admin* button to begin customizing your store.

[Click here to go to the Store](#)[Click here to open the Admin area](#)

Copyright © 2003-2013 [Zen Cart®](#)

The first time you try to access your admin pages you will get the warning below, don't worry just follow the instructions within and the warning message will be resolved.

## Warning!

Warning: You cannot access the admin until you have

- deleted the `zc_install` folder.  
(Use your FTP program or your hosting control panel.)
- renamed the admin folder.  
[Help for renaming the admin folder can be found here](#)

Then, to access your admin area, type the admin URL into your browser, ie:  
[http://www.your\\_site.com/YourAdminFolder/](http://www.your_site.com/YourAdminFolder/)

When you have logged in as admin you should see the same as the image below. Go to modules and choose the sub menu payment.

Your version of Zen Cart® appears to be current.  
(You are presently using: v1.5.1)

When the module is successfully installed it's time to setup what currency your store will use. Remember that our module only accept SEK or Euro's as currency. I will show below how to install Swedish krona. Mouse over Localization and select Currencies.

Click on the button "new currency"

Add the title, code, enter if symbol should be right or left, and enter the preferred decimal point, if there should be a thousand point. One of the most important things to remember when setting up a new currency is to add 2 decimal places. Set the value to 1.0000000, and also remember to mark the check box to set this currency as the default.

**New Currency**

Please enter the new currency with its related data

Title:  
Svensk krona

Code:

Normally the customer would go their preferred bank, but since I am connection to our test server I can now simulate whether the payment was successful or not.

### Test Environment

This is the Payson test environment. If you arrived here expecting to conduct a real transaction, please contact Payson support at [kontakt@payson.se](mailto:kontakt@payson.se).

This payment is processed by Payson  
Simple and secure payments on the Internet

### [Placeholder for Bank payment window]

A live transaction would have redirected the customer to the chosen bank's online payment page.

RECEIPT OF PAYMENT - NOT PROOF OF PURCHASE

You should now return to your shop with the following message if the payment was successful.

**Thank You! We Appreciate your Business!**

**Your Order Number is: 3**

**Checkout Success Sample Text ...**

A few words about the approximate shipping time or your processing policy would be put here.

This section of text is from the Define Pages Editor located under Tools in the Admin.

This file is located in /languages/english/html\_includes/classic/

**NOTE: Always backup the files in**

/languages/english/html\_includes/your\_template

Thank you for shopping. Please click the Log Off link to ensure that your receipt and purchase information is not visible to the next person using this computer.

log off

To check if the order has been logged in your store enter your stores admin mode. Mouse over the Customer menu and choose the sub menu Orders.

You should then see the following order (Order id 3).
